I thought that this driver's ed class was pretty informative. I learned a lot about things I had never thought about, like what to do if the hood of your car flies up. You made the class really easy and I hope you do the same with the driving part of the class! I wish we had watched more movies about driving like the one we watched on the first day, and less like The Fast and the Furious. 😊 I like how involved I felt in the class.
